3:00 EDT P.M.

Turkeys raised in 1973 are expected to total 132 million birds, 2 percent more than in 1972, according to the Crop Reporting Board. Minnesota, the leading State, expects to raise 23 million birds compared with 21 million a year ago, an increase of 10 percent. California expects a decrease of 2 percent from a year ago but North Carolina, the third largest State, expects an increase of 12 percent.

Heavy breed turkeys raised in 1973 are expected to total 116 million, up 2 percent from the 114 million raised in 1972. Light breed turkeys raised during 1973 are estimated at 16 million, a 6 percent increase from the number raised in 1972.

Poult hatchings during the period September 1972 through July 1973 were above a year earlier in all months except February, March, April and May. Turkey eggs in incubators August 1, 1973 were up 5 percent from last year.
